

## Decision Support Page Help Document

### Text Product Section:

Select the text product image to open the current version of the text product.

Selection will open in a new window just below the **Text Product** menu.

**Close** / **Open** button appears once a page loads in the new window.

This allows you to toggle the window Open or Closed.

If the window is closed and you make another selection from the Text Product menu, then the window will toggle open automatically.
